COMPANY BIO

The Garage Shop was created in 2011 to take his passion for speed and turn it into a successful race car fabrication business. As someone who desired to be his own boss, Aaron used decades of experience working in NASCAR to fuel a creative model for restoring and recreating iconic race cars to reach record-breaking speeds.

What Aaron didn't expect when he created The Garage Shop was he would be creating something else – a tight-knit family of talented and passionate people who helped make his vision a reality. Aaron is always quick to spread the praise and credits surrounding himself with good people as his secret to success.
